

# Case Study Pall Corporation

## About Pall Corporation

Pall Corporation is a global supplier of filtration, separation and purification products. As an industry leader, Pall help a diverse range of customers solve complex fluid management challenges.

### THE CHALLENGE

Taxback International was recommended to Pall Corporation due to the success of existing relationships within the corporation. This internal influence made it a simple decision.

### THE SOLUTION

Taxback International conducted a free real-time analysis for Pall Corporation and identified significant opportunities and potential to reclaim VAT on foreign expenses. Taxback International's automated process seamlessly and securely integrates with Pall Corporation's expense system, SAP Concur. This touchless integration with SAP Concur provides Pall Corporation full visibility, complete tracking, advanced reporting, savings and compliance in a single centralised solution.

### THE RESULT

Pall Corporation's VAT reclaim increased significantly, claiming in excess of €400,000 to date, working with Taxback International. The benefit to Pall was not only maximising their VAT reclaim, but driving improvements and compliance within Pall Corporation through educating their users on the correct way to reclaim VAT and how to optimise their receipts. Pall Corporation can now pinpoint specific entities, departments, and employees where VAT leakages occur. Incentives can then be introduced to target these areas, encouraging employees to improve their VAT recovery.

*"Some really good feedback from fellow operating companies made it an easy decision for Pall Corporation to go with Taxback."*
